

## NASPL Names Linq3 to Supplier Status

March 24, 2010—Linq3 Technologies, the supplier of draw lottery capabilities on ATM's and other unmanned point-of-sale terminals, announced today its title as an Official Supplier to the Lottery Industry through [NASPL](#), the North American Association of State and Provincial Lottery.

Per the [NASPL](#) website:

Linq3 Technologies serves the needs of State lotteries and their operators by enabling unmanned point-of-sale terminals such as ATM's, consumer facing card swipes (grocery, retail, etc.) and other terminals (airport, taxi, etc.) to distribute draw lottery (Mega Millions, Powerball, etc.). By leveraging the pre-existing footprint of these terminals, Linq3 is able to provide the States with a low cost solution to accessing both increased distribution and a new consumer demographic. Linq3's software includes encrypted logging of all ticket purchasing information and is stored in PCI compliant and SAS70 data centers. Other features include texting of numbers played and winning numbers as well as auto-redemption of winners below the reportable limit in the machine's jurisdiction.
